

The Metro District's 2014 Concrete Trail Plan includes work in Filing 24A. The new trail is to begin off the existing trail about ¼ mile east of Sage Thrasher Road where it will extend southward with a low flow crossing across Timbers Creek before turning eastward. The trail will head southeasterly before turning southward through the common area to end on Horned Owl Way. The trail plan was and is in response to requests for a north/south connection for residents in the southern and eastern portion of the District. In response to some neighborhood concerns, the trail is on hold until further consideration by the Board at the November 13, 2014 meeting at 12 PM at Pinery Water District, **5242 OLD SCHOOL HOUSE ROAD, PARKER, COLORADO.**
